Flexibility

flexibility in installation

Scalable Solutions

Complete Access Control

Why Choose Millennium Smart Locks?

Two technologies, one software—MGI continuously innovates, delivering a complete and adaptable solution for modern access control.

- **Flexible Access Methods:** Use the smart locks with a keypad, mobile app, or card/fob for versatile entry options.
- **User-Centric Design:** Millennium Ultra smart locks fits right into our software allowing the customer to use our user-friendly interface and enhanced features, providing a tailored access control experience.
- **Holistic Integration:** These smart locks integrate effortlessly with existing Millennium's security systems, providing a comprehensive, cohesive approach to safeguarding your property and enhancing daily life.

Beyond CLOUD ACCESS, We Grant CONFIDENCE

Millennium wireless locks offer an alternative to hardwired access control for residential doors or challenging installation locations. These locks seamlessly connect to the Millennium Ultra software. Designed for various settings such as villas, offices, apartments, student housing, and Airbnb rooms, the stylish wireless handles empower users to manage access with precision. The user-friendly interface and customizable features ensure a tailored experience that integrates well with Ultra Version 8.0 software.
